Your *Free* Ticket to Proactive Networking!

ProCurve Manager is a breakthrough in network management software that gives you more network with less work. ProCurve Manager is available for free on the ProCurve Networking Web site www.procurve.com.

Software Updates Are *Free!*

ProCurve Networking provides free software updates on the ProCurve Web site for your Series 1800 Switch. To access the software updates, go to the ProCurve Web site at www.procurve.com, then click on **Software updates** to go to the “ProCurve Networking software updates” page. Under **Latest software** click on **Switches** to go to the page that has the free download for your switch.

Register for Automatic Notification of Updates. From the “ProCurve Networking software updates” page, you can also register yourself to automatically receive email notice of new updates for your managed ProCurve networking products.

To determine whether you have the latest software, you can compare the software version that is available on the web site with the version that is currently installed on your switch. Follow the instructions below to determine the current software version on your switch.

To Determine the Current Software Version in Your Switch. For the Series 1800 Switches, use the following method to view the software version:

- In the web browser interface, click on the **System** menu, and then the **Information** tab. The current software version is listed as the **revision** number in the **Software Version** line.
