

Release Notes: ProCurve Identity Driven Manager Version 2.15, Update 1

ProCurve Identity Driven Manager (IDM) version 2.15 Update 1 supports these products:

- J9012A ProCurve Identity Driven Manager 2.1 base product - 500-user license
- J9013A ProCurve Identity Driven Manager 2.1 base product - upgrade from IDM 1.x to IDM 2.1, 500-user license
- J9014A ProCurve Identity Driven Manager 2.1 additional 2000-user license

IDM version 2.15 is an add-on module to ProCurve Manager Plus (PCM+) version 2.2. If you are using an earlier version of PCM or PCM+, you must first upgrade to PCM 2.2 before you can apply the fixes included in this update.

These release notes include information on the following:

- A listing of software fixes included in the Auto-Update releases. ([Page 3](#))

Software Management – ProCurve Identity Driven Manager 2.15 Updates

If upgrading from ProCurve Manager 2.2, ProCurve Manager 2.2 Update 1 must be manually installed before installing this ProCurve Identity Driven Manager 2.15 update. Once you have installed the ProCurve Manager 2.2 update, you can install this update using the “Automatic Update” feature in PCM+, or you can install it manually.

To verify if the Update has already been installed, look in the Update History window under the PCM Global Preferences:

[Tools->Preferences->Automatic Updates->Update History]

Using the PCM Automatic Update to Install

1. Open the Preferences panel in the PCM Client and select the **Automatic Updates** node.
2. Click the **Check Now** button. A dialog appears with a list of the available update(s).
3. Select the update, ensure that the **install** checkbox is enabled and click the **Next** button.
4. A warning message appears, advising you that any PCM clients will be disconnected. Click **OK** to continue.
5. After the update package is downloaded, you will be prompted to close the PCM Client. Click **OK** to close the pop-up, then close the Preferences window and exit PCM.

The update will be applied and the PCM services restarted. Once this is done you can reconnect with the PCM client and begin using the updated version of IDM.

Using the Manual Process to Install

1. Copy the idm_2_15_update_1.zip file to the \PNM\server\data\download\autoupdate directory.*
2. Open the Preferences panel in the PCM Client and select the **Automatic Updates** node to display the Global:Automatic Updates panel.
3. Click the **Check Now** button at the bottom of the panel to display the **Select update mode:** dialog.
4. Select the **Check for updates in PCM's download folder** option and press **Next**.
5. You should see the new auto-update presented for installation, and you can continue with the Update installation (steps 3 through 5 above).
6. Restart the client and verify that the update was applied by checking the **Update History** node located under the Automatic Updates preference node.

* The default PCM server installation directory is: C:\Program Files\Hewlett-Packard\PNM\server on the workstation where PCM was initially installed.

Software Fixes in IDM 2.15 Update 1

The following IDM problem was resolved in IDM 2.15 Update 1

- no PR — Removed references to Procurve Network Access Controller 800 components, which will be added in IDM 2.2.
