

Release Notes: ProCurve Manager Version 2.2, Update 1

PCM version 2.2, Update 1 supports these products:

- J9056A ProCurve Manager Plus 2.2 - upgrade from PCM 1.6 license to PCM Plus 2.2 50-device license
- J9057A ProCurve Manager Plus 2.2 - 50-device license
- J9058A ProCurve Manager Plus 2.2 - +100-device incremental license
- J9059A ProCurve Manager Plus 2.2 - unlimited device license, upgrade from PCM 1.6 100-device license

IMPORTANT: This update is intended to upgrade PCM 2.2 installations only and bring PCM 2.2 up to the fix level of PCM 2.2.1. It is not necessary to install this update on PCM 2.2.1 installations.

If you are using an earlier version of PCM or PCM+, upgrade directly to PCM 2.2.1 instead of installing PCM 2.2 and this update. It is only necessary to install this update if you are using PCM or PCM+ 2.2.

These release notes include a listing of software fixes included in the Auto-Update releases. ([Page 3](#))

Software Management – ProCurve Manager 2.2 Updates

This ProCurve Manager Plus 2.2 (PCM+ 2.2, Update 1) update upgrades PCM 2.2 to the same fix level as PCM 2.2.1. Installing this update on PCM 2.2.1 has no effect. This update has no new device support, IPS support, or enhancements.

This ProCurve Manager Plus 2.2 (PCM+ 2.2, Update 1) update must be installed manually. The “Automatic Update” feature in PCM+ CANNOT be used to install Update1, however Automatic Update can be used to install all future auto updates.

To verify if the Update has already been installed, look in the Update History window under the PCM Global Preferences:

[Tools->Preferences->Automatic Updates->Update History]

Using the Manual Process to Install

1. Copy the pcm_2_2_update_1.zip file to the \PNM\server\data\download\autoupdate directory.*
2. Before beginning the installation, delete all empty custom groups.
3. Open the Preferences panel in the PCM Client and select the **Automatic Updates** node to display the Global:Automatic Updates panel.
4. Click the **Check Now** button at the bottom of the panel to display the **Select update mode:** dialog.
5. Select the **Check for updates in PCM's download folder** option and press **Next**.
6. You should see the new auto-update presented for installation, and you can continue with the Update installation (steps 3 through 5 above).
7. Restart the client and verify that the update was applied by checking the **Update History** node located under the Automatic Updates preference node.

* The default PCM server installation directory is: C:\Program Files\Hewlett-Packard\PNM\server on the workstation where PCM was initially installed.

Software Fixes in PCM 2.2 Updates

Unless otherwise noted, each new release includes the software fixes added in all previous releases.

Update 1

The following PCM problems were resolved in PCM 2.2 Update 1

- PR_1000426771 — If PCM is installed with the Auto Update option set to “Download and Install Automatically”, the Client may hang when it tries to download an Auto Update. To recover after a failed Auto Update attempt, restart the Management Service (in Windows Services) or reboot the Client PC and manually install the Auto Update.
- PR_1000437688 — PCM reports “Login failed: No user manager server found” and various AIO failure codes.
- PR_1000436776 — PCM reports “Login failed: No user manager server found” and the upgrade fails (does not affect new installations) due to empty custom groups, null BSSID values, or apostrophes in custom group names or descriptions.
- PR_1000439484 — Blank page in Throttled event (Global:Event:Throttled:Events) from the Global Preferences window after an upgrade to PCM 2.2.
