## Installing and Using Endpoint Integrity Checking

Endpoint integrity checking is an important tool in controlling access to your network. To ensure that this tool is successfully installed in your network, ProCurve requires customers to have an implementation service provided by ProCurve certified partners or to purchase an implementation service from ProCurve for the initial installation. Contact an authorized ProCurve reseller or your ProCurve representative for information on what is provided by, and what is required in your network for, this service.

Also, customers using endpoint integrity checking need to purchase Endpoint Integrity Agent License(s) for use with their ProCurve Network Access Controller 800.

## View or Download the Software Manual Set

The printed *ProCurve Network Access Controller 800 Hardware Installation Guide* shipped with your unit describes installing and minimally configuring the appliance. For further information, please visit the ProCurve Web site, where you can freely view or download the latest information and manuals for your product. To do so:

1. Go to <http://www.procurve.com>.
2. To display the list of downloadable manuals, click on the following links:

### Technical support

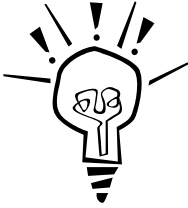

#### Product manuals (all)

#### **ProCurve Network Controller 800**

(You may want to bookmark this Web page for easy access in the future.)
